OUR

TEAM

Our Mission: To serve as a trusted partner with beef and dairy producers, building their success through industry-leading genetics, effective herd management products, valuable services, and experience-based insights from knowledgeable, passionate employees.

Are you focused on success? Do you enjoy working with people and animals? Do you want to work for the industry leader? If you answered "yes" to these questions, you might be interested in learning about one of our positions below!

Reproductive Service Specialist

Assists herd owners with achieving and managing reproductive success by breeding animals on the farm. Either performs on-call service where the RSS inseminates cattle on a cow-by-cow basis, or manages the entire reproductive program of a farm on a whole-herd basis. Positions are commissioned, so starting salaries can be very strong. It is not uncommon to earn \$50,000 to \$100,000+ as a Premier Select Sires RSS.

Area Sales Manager

Works with herd owners who breed their own cattle by selling and delivering semen and supplies, consulting on reproductive issues, and keeping customers informed on the latest industry developments. Positions are salaried with commissions, so the earning power in these positions can again be very strong.

Dairy Coordinator

Administers the Select Mating Service® (SMS)® and the Genetic Data Partner (GDP) program for Select Sires. SMS is the world's leading corrective mating program, and it helps herd owners utilize the best of Select Sires' genetics on their cattle. The GDP program incorporates genomic testing to ensure that Select Sires is using the best young sires available in A.I. today.

Reproductive Specialist

This highly-trained position assists all Select Sires herds to achieve maximum reproductive efficiency. It uses the RePRO™ herd management software, along with the latest timed A.I. and heat detection assistance products to fine-tune a herd's reproductive program. Many herds on the Select Reproductive Solutions® (SRS)® program have achieved all-time highs for reproduction by implementing the suggestions of the reproductive specialist, and by using the systematic approach of the SRS program.
